AI Agents in Legal Operations

Live Demo Run-of-Show

Sequence, demo owner, and timing for the legal operations AI agents workshop.

#	Agent / Segment	What to Show	Owner	Time
1	Lead Intake Agent	use demo → then show "My Whole Workflow"	David	15 min
2	Lead Outbound Agent	Outbound follow-up flow for prospects / leads	David	—
3	Court Date Calendar Sync Agent	Rollk demo → starter Prompt → Workflow: Calendar Sync Scheduler	David	5 min
4	Daily Briefing Agent	Prompt: "Give me a daily briefing of upcoming trials." → show schedule in AI studio → Gmail sent folder	David	5 min
5	Email Triage Agent	Send email to clegalmind@gmail.com → check Gmail Drafts for organized response	David	5 min
6	Document Update Agent	Show case/document update workflow and how the firm receives the update	David & Mustafa	5 min
7	Video Filing Agent	upload video → add case details + update email → submit	David & Mustafa	15 min
8	Case Manager / Case Research Agent	Ask about any matter → use starter prompts to fetch case details	David & Mustafa	5 min

Positioning: These are workflow agents — not job replacements. Each demo shows how AI reduces manual follow-ups, status checks, drafting, and scheduling.

Tired of dealing with legal staff who...

Drive Up Your Costs

- ✓ Hiring local legal talent means paying premium salaries that strain your firm's margins.

Don't Stay Committed

- ✓ Legal hires often move on quickly, disrupting case continuity and forcing constant rehiring.

Lack Practical Legal Expertise

- ✓ Many candidates don't bring the real-world legal experience your cases demand.

Are Difficult to Recruit

- ✓ Many candidates don't bring the real-world legal experience your cases demand.

Increase Your Firm's Overhead

- ✓ Office space, legal tools, and administrative support quickly add up.

Are Hard to Let Go Of

- ✓ Terminating legal staff can expose your firm to compliance risks and legal complications.

Show Entitlement, Not Accountability

- ✓ Instead of ownership, you often face attitude issues that impact team performance.

Require Constant HR Oversight

- ✓ Managing legal staff demands ongoing effort — from compliance to payroll and beyond.

AI Agents can revolutionize your law firm Cost Efficient

*Leverage AI Agents at a
fraction of the cost of
traditional local hires.*

- 01 No Hidden Expenses** No payroll taxes, benefits, or overhead — just predictable, flat costs.
- 02 Instant Deployment** Get up and running quickly without long hiring or onboarding delays.
- 03 Unlimited Capability** Scale with AI that can handle high volumes without capacity limits.
- 04 24/7 Productivity** Operate without interruptions — work continues anytime, at your pace.
- 05 Zero HR Hassles** Eliminate payroll, compliance, and administrative burdens completely.
- 06 Effortless Scalability** Scale up or down instantly without the complexities of hiring or firing.
- 07 Lower Risk** Reduce legal exposure and operational risks tied to human staffing.
- 08 No Workplace Negativity** Maintain consistent, high-performance output without human friction.
- 09 No Office Drama** Run operations smoothly without internal conflicts or politics.

AI Agents for Daily Law Firm Operations

Specific legal workflows you can demo live — not generic job replacements.

Calls & Leads → Scheduling → Matter Work → Client Updates → Court + Payments

01 Missed Call Recovery

Calls/texts missed callers, qualifies them, and books consultations.

Phone intake

02 New Lead Follow-Up

Follows up with web, ad, referral, and old leads automatically.

Lead conversion

03 Consultation Scheduling

Finds slots, books consults, sends reminders, and handles no-shows.

Calendar

04 Matter Summary

Creates quick case summaries from matter details, notes, emails, and docs.

Attorney prep

05 Email Triage

Reads inbound emails, identifies urgency, routes work, and drafts next steps.

Inbox

06 Client Onboarding

Collects intake info, requests documents, and prepares attorney review.

Onboarding

07 Case Updates

Sends proactive status updates so staff answer fewer repeat questions.

Client service

08 Court Document Update

Flags docket/court document activity and alerts staff when action is needed.

Court data

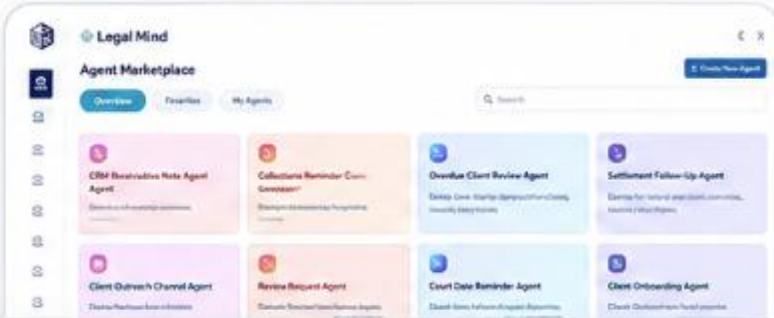

09 Payment Reminder

Sends polite invoice/retainer reminders and logs outreach for staff.

Billing

Launch new automations faster with reusable agents

Legal Mind - AI Platform for Legal Use

Available on Azure Marketplace

The screenshot shows the Microsoft Marketplace interface. At the top, the Microsoft logo and 'Marketplace' text are on the left, with a 'Products' dropdown and a search bar on the right. Below this is a navigation bar with 'All', 'Products', 'Categories', 'Industries', and 'Partners' dropdowns. The main content area shows the breadcrumb 'Products > CampusMind - AI Workforce for Higher Ed'. The product card for 'Mindplatform - AI Workforce for your organization' by ROYAL CYBER INC is displayed. It features a logo of scales of justice, the text 'Azure Applications', and a 'Get it now' button. Below the product card are tabs for 'Overview', 'Plans + Pricing', 'Ratings + reviews', and 'Details + support'. The 'Overview' tab is selected, showing a description of the platform as an Azure-native AI workforce platform for higher education, including a section on what it is and who it benefits.

 **Mindplatform - AI Workforce for your organization**
by ROYAL CYBER INC
[Azure Applications](#)
Pricing Price varies [Get it now](#)

[Overview](#) [Plans + Pricing](#) [Ratings + reviews](#) [Details + support](#)

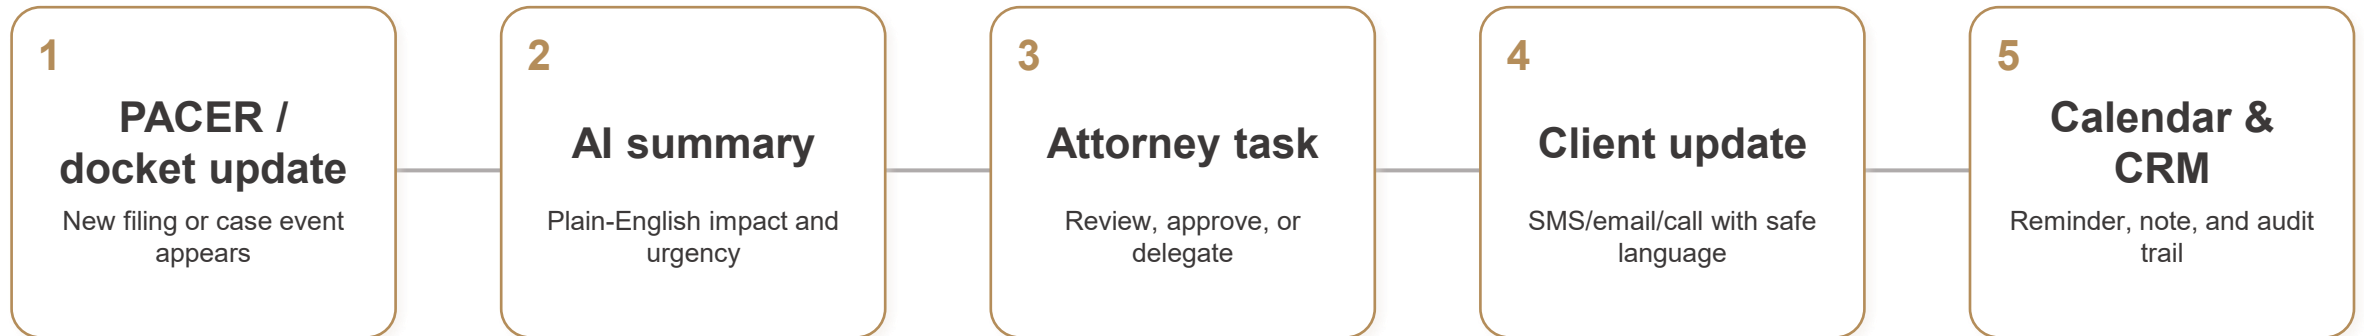

Azure-native AI workforces for higher ed, plus no-code agent studio and governance.

What CampusMind Is
CampusMind is an Azure-native AI workforce platform for higher education. It combines pre-built workforces for common campus functions with a no-code Agent Studio so departments can build and publish their own agents, including multi-step workflow orchestration, under centralized governance.

Who Benefits and What Problem It Solves
CampusMind benefits higher ed teams like CIOs, IT leaders, faculty support, admissions, and service desk managers who need scalable, quick workflow support. It solves the problem of high-volume, repetitive tasks that overwhelm staff, offering always-on support and fast agent deployment without extra systems.

Turn docket activity into Operational Follow-through

The power is not just reading a filing. It is triggering the right next step across the firm.

Example:

“New motion filed” → summarize → create attorney task → send client-safe update → schedule deadline reminder → log in Clio/MyCase/Filevine.
